

We must guard our freedom of speech at all costs.

As media group after media group merge together, increasingly our access to different voices is blurred by interference.

Please do not accept the current proposal on IBOC before the FCC without testing by independent engineers.

If the FCC allows itself to be the mule of large commercial broadcaster it forces all others in the nation to bear the burden of silenced radio waves.

Our system is supposed to maintain freedom of speech, not the power of commercial conglomerates.

Please prove that the FCC is more than a minion of monopolies. Protect the small broadcasters and our marketplace of ideas.

We cannot afford to prevent free speech by the lower power broadcasters.

Yours Sincerely,

Caroline Cox
